Quicklisten:

In this episode, we catch up on personal projects.

- Just the Tip
- Notes
- 15 Clams
- Errata
- Music

## Just the Tip

- SANS had a breach. Yikes.

## Notes

Starts at **24m17s**.

I was drinking water. Paden was drinking cranberry juice. Jthan was drinking Killian's Red.

- Personal projects!
  - r00t^2
    - Game nights! (Last one and one coming up)
    - I've also been learning Golang (in hopes that it will help with rewriting AIF-NG).
    - I also set up my wife's home office.
  - Paden
    - Got rid of his rack and is consolidating his homelab.
    - His HAM stuff is taking over.
    - He's been playing with Discord bots.
    - And fixing his ceiling.
  - Jthan
    - He's been playing with his HAM radio and SDR stuff.
    - He's now an airplane nerd. He'll be playing Microsoft Flight Simulator before you even know it.
    - He's also been looking into VPS providers. He's a Vultr shill now.
      - Because he's trying to run OpenZFS (formerly ZFS on Linux ?) on a VPS. As his / mountpoint. **lol**.
    - He's also been getting back into his RHCSA training and is considering a "lesser" cert first to "boost his confidence".

## 15 Clams

In this segment, Jthan shares with you a little slice of life. The title is a reference to this video. (2m16s in)

Starts at **53m15s**.

Jthan plays with MinIO. It's apparently S3-API compatible.

## Errata

- The “don't attribute to malice” thing we were trying to remember is Hanlon's Razor.
- Jthan, Linode has a rescue ISO you can boot from. You don't need to make a dedicated disk just to dd over SSH.
- Jthan doesn't know how to pronounce geoduck.
- Jthan, you **are** one of “the people on the Internet”.

## Music

### Music Credits

Track	Title	Artist	Link	Copyright/License
Intro	Broken	Faserklang	click	CC-BY-NC-ND 4.0
Outro	Reintroduction	Viktor Van River	click	CC-BY-NC-SA 4.0
