Quicklisten:

The ending for Season 5!

A reminder that shitshows are NOT a good indication of the show; it's more of a party. If you're more interested in actual content (and episodes that aren't 4.5 hours long…), check out previous non-Shitshow episodes. Thanks for all who joined- the regular Hosts, Beaches, Dranx, Forge, Kateo, Nosbig, and Taters!

Just the Tip

- "Use Signal, use Tor."

Notes

Starts at **14m52s**.

I was drinking Boone's Farm sangria and the Excelsior Classic Cabernet Sauvignon (talk about a low and a high in quality). Paden was drinking PBR. Jthan was drinking Michelob Ultra. Dranx was drinking (I think) a Burnley Brewing lager (If I had to guess, based on their current selection, it was their Vienna Lager) and a tiny little bottle of Buffalo Trace's Eagle Rare. Forge was drinking water ("PBR Lite"). Kate had wine in the fridge this year, but was drinking a Blake's cider flavored with strawberry and kiwi (it seems to no longer be offered by them/was probably a limited run) with a vodka redbull in the fridge. Nosbig was drinking water. Beaches was not drinking anything.

- Shitshow!
  - Jthan wants to know if ducks and tractors "cancel each other out".
  - Jthan is afraid of birds. And sea cucumbers.
    - Yes, sea cucumber defenses really do look suggestive. I mean really suggestive.
  - John McAfee (yes, the guy that wrote the antivirus program way back) did indeed fuck a whale (or at least claimed to).
  - No, Jthan, you can't get a refund on a degree.
  - Kate asked us what our favourite episodes of S5 were.
    - Jthan liked S5E19
    - Paden liked (I think) S5E18 (or at least liked the name).
    - I liked S5E15.
      - Paden also liked S5E15 because he had a pretty good tip for it.
  - We talk about CentOS moving towards CentOS Stream-only and the benefits/disadvantages of having that in prod.
    - I think the IBM linux distro I was thinking of is PowerKVM.
  - I mentioned to… Nosbig or Forge, I can't remember, that there's a hardware switchable QWERT/DVORAK keyboard.
    - Nosbig also let us know there's a keyboard that has individual **displays** per key.
  - Jthan doesn't know how babby is formed.

- Jthan actually did break Sysbot.
- Forge still has Jthan's VPN noise.
- Beaches told us about Pax, but I forgot to mention that GNU tar supports a similar feature.
- Nosbig told us about Netbox.
- Taters was disappointed in the lack of genital customization and physics in Cyberpunk 2077.
- I helped with TASGiving – they raised 10k! Congrats, guys!

15 Clams

In this segment, Jthan shares with you a little slice of life. The title is a reference to this video. (2m16s in)

Starts at **4h26m05s**.

Jthan just wants you to have a happy and healthy/safe holiday season.

Errata

- "Is your clam ready for my linquine?" is from Zapped Again! which I was wrong about – it actually came out in 1990, not the 80's. (The predecessor however did come out in the early 80's.)
- My vape is an Innokin Proton with Plex tank.
- At **1h14m26s**, I listened to my isolated audio track. I said "Jthan, would you rather fight a tractor full of ducks or a *tractor*-sized duck?" I think everyone heard Paden talking at the same time as me and thought I said "a duck-sized duck". I CAN PROVIDE EVIDENCE. I SAID A TRACTOR-SIZED DUCK.
  - THE GASLIGHTING IS REAL.
